Intro

This document contains interaction designs for storefront pages.

This document shows and explains the functionality provided by the Payone Service Connector. Please see the Checkout and My Account wireframes for a complete documentation of the Intershop reference application.

Disclaimer

This document strives for completion. However it cannot be guaranteed that 100% of all features are covered.

Payment Workflows

There are different ways how the different payment methods are integrated into the checkout. The online payment methods use a redirect after the checkout. The other methods work via direct communication. Credit card is a combination of both, a redirect only happens if the customer's card is enrolled for 3D Secure.
