

System Check

*The first step of the system check is to qualify the issue and to define the next analysis steps. The **SYSTEM CHECK** aims to get an overview of the systems hard and software architecture and connected third party systems. The system check is handled by a dedicated support engineer who involves experts and coordinates system changes, tuning actions and monitors the success.*

Result

- ▶ *Issue qualification*
- ▶ *Written System Report*
- ▶ *Define the next analysis steps*

Price

1 man day, booking mandatory in advance of Application Review
